Q - NOVA LIGHT

Erase The Past Glow Forward

4 Treatment Probes

- 1 1064 nm: (Remove tattoos)**
Removal of dark pigments such as black and blue.
- 2 532 nm:**
Removal of lighter pigments such as red and brown (suitable for eyebrow tattoos).
- 3 1064 nm: (Carbon Peeling)**
Removal of blackheads, skin brightening, and non-ablative skin rejuvenation.
- 4 755 nm:**
Removal of pigments, skin rejuvenation.

Q - NOVA LIGHT

The Q - NOVA LIGHT is an advanced Q-Switched laser system, designed and manufactured with cutting-edge technology.

By utilizing ultra-short, high-energy pulses (5ns-6ns), this system provides effective treatment for the removal of various types of tattoos and pigmented lesions, while also promoting skin rejuvenation and restoration.

Applications

- Effective removal of dark and multi-colored tattoos
- Treatment of both superficial and deep pigmented lesions (such as sun spots, freckles)
- Skin rejuvenation through Carbon Peel technology (carbon laser peel)
- Management of melasma and post-inflammatory hyperpigmentation (PIH)
- Deep skin cleansing and pore size reduction

Advantages

- Locally manufactured with high-quality imported components
- Safe and effective for all skin types, including darker Fitzpatrick phototypes
- Delivers results without causing damage to surrounding tissue
- Equipped with an intuitive, user-friendly interface
- Comprehensive training provided free of charge

Technical Specifications

- Laser Type **Nd:YAG**
- Wavelengths **1064 nm / 532 nm / 755 nm**
- Output Energy **Up to 1600 mJ**
- Pulse Duration **5–6 ns**
- Repetition Rate (Frequency) **1 Hz-6Hz**
- Display **12.1-inch color touch LCD**
- Cooling System **Hybrid cooling (water + fan)**
- Aiming Beam **650 nm red diode laser**
- Number of Headpiece **4 pcs**
- Power Supply **220 V AC**
- Dimension of machine **42cm*34cm*32cm**
- Dimension of package **66cm*56cm*46cm**
- N.W. **16 kg**
- G.W. **35 kg**
